

What the dentists say

We tell our patients that good dental hygiene is the foundation for good oral health. And I tell my colleagues that a good dental hygienist is the foundation for a successful dental practice. Ever since Laurelyn Higgins joined Smile Dental in 1999, she has made a substantial contribution to our patient care, our work culture and our business success. Laurelyn's professional development workshop for hygienists and dentists will make a valuable contribution to a key member of your staff, and your practice in general.

Dr Cameron Arnold
Principal
Smile Dental

I have never known anyone more enthusiastic and dedicated to making this aspect of the practice all about the patient and their health as well as the health of the practice's bottom line. Their generosity of information, presentation quality and overall dedication to showing us a good time is unsurpassed. Don't just send your hygienist, go yourself and get a clear direction for continuing care in your practice.

Dr Anne-Maree Cole
Cole Dental
Brisbane

I've really enjoyed hearing Laurelyn and sharing ideas with Dr Cameron Arnold. Your patient-centred philosophy of care is modern, up-to-date and appropriate. I enjoyed your professional presentation, your openness in sharing your ideas, systems and philosophy, and the opportunity to meet our colleagues.
